Functions

Perfect Technology for global coin processing

Operator friendly due to the simplest handling of the machine

- worldwide unique GBS-Multi Coin Sensor System
- handling of coins and tokens simultaneous
- 7 parameters of coin inspection per denomination
- Self teaching mode, independence of currency
- Simplest upgrade of coin data
- high intelligent technical features for the 24hour Lobby area
- Escrow function, intermediate coin box
- autom. compressor cleaning device
- autom. reject of foreign coins
- autom. cleaning device for foreign objects and damaged coins etc.
- autom. coin tray locking
- extensive GBS-Software package for technicians, operator and customers
- faultless handling of damaged coin
- automatic Stop in case of an machine failure, error message is displayed
- automatic Stop after reject of 15 coins in series
- simultaneous counting of two diff. currencies up to 9 denominations each (Euro and local currency, etc.)
- simplest maintenance by machines operator

Technical Details

more than 1400 installations since 1997

- 2mm steel sheet cabinet
- 4 line LC – Display, 20 digits per line
- 2 coin collection container / bags, autom. switching
- Manual Card reader (also for Saving Books with magnetic tracks)
- Online connection via RS 232
- Storage of the current 999 transactions
- counting speed – approx. 600 coins / minute, dependence on diameter and thickness of coins
- handling of coins: the diameter of the biggest coin must be smaller as the sum of the diameters of two smallest coin
- Thickness: 1,2mm - 3,2mm
- Thermal printer, 60mm paper width, autom. cutter and paper end control sensor
- Restore of all technical data by machines system error
- Sensor technology is approved by: Austrian National Bank

Technical Specification

- Voltage: 230VAC 50Hz
- Operating temperature : +10°C - + 35°C
- Power Consumption: max. 200W
- Interface: RS 232
- Dimensions: W / D / H - 600 x 600 x 1120mm
- Weight: 130 kg
- Battery Backup: data protection against voltage loss
